Water thoroughfare. Water thoroughfare means a waterway, without flowage, connecting two bodies of water.

Thoroughfares and bogs. The general fishing laws which govern lakes and ponds also apply to thoroughfares and bogs.

SPECIAL FISHING RULES

In addition to the general laws and rules printed on pages 3 through 7, many waters (or portions of waters) have special fishing rules. The special rules may be either more liberal or more restrictive than the general provisions; however, whenever any variance occurs between a special rule and the general provisions, the special rule always applies.

To determine which, if any, special rules have been adopted for a particular body of water, check for the name of the water in the alphabetical listing of waters under the appropriate county heading. **Waters which have only a FFO (fly fishing only) restriction are listed together in Group I under the appropriate county heading. Waters which have only a NLFAB (use or possession of live fish as bait is prohibited) restriction are listed together in Group II. Waters which have additional special regulations are listed under Group III.** Waters which have names like "Third Mud Pond" will be listed as "Mud Pond, Third." Waters which lie in more than one county are listed under each appropriate county and cross referenced to the first county alphabetically. **BORDER WATERS** between Maine and New Brunswick and between Maine and New Hampshire are listed under separate headings on pages 42 and 43. In addition, most waters which are **OPEN TO FISHING IN OCTOBER** are listed together at the end of each county section. All waters which do not have special rules are open to fishing under the general fishing provisions.

IN THESE SPECIAL RULES

- All dates are inclusive.
- "Closed" means closed to all fishing.
- "**NLFAB**" means that the use or possession of live fish as bait is prohibited.
- "**FFO**" means fly fishing only as defined on page 3. (Note: It is a violation of State law to troll a fly in waters restricted to fly fishing only.)

ATLANTIC SALMON FISHING REGULATIONS

Regulations on Atlantic salmon fishing are contained in a publication of the Atlantic Sea Run Salmon Commission. Copies are available from wardens and license agents in the vicinity of Atlantic salmon rivers and from the offices of the Fish and Wildlife Department, Marine Resources Department, and Atlantic Sea Run Salmon Commission.

A permit is required to fish for Atlantic salmon in all internal waters of the state. The permit is required in addition to a regular fishing license in all inland waters. Fees: A legislative proposal to revise the fee structure on salmon permits was still pending at the time of this publication. Permits may be purchased from the Fish and Wildlife Department, Augusta office, or from clerks of certain larger cities, certain larger sporting goods stores, or regular license agents in the vicinity of Atlantic salmon rivers.

LAWS PERTAINING TO LIVE BAIT AND BAIT DEALERS

A. Live Bait restriction. It is unlawful for any person to take, sell, use or possess, either dead or alive, for use as bait for fishing in inland waters, any pickerel, goldfish, yellow perch, white perch, bass, sunfish, crappie, hornpout, carp, or any spiny-finned fish.

B. Importation of bait-fish prohibited. It is unlawful to import into this State any live fish, including smelts, which are commonly used for bait fishing in inland waters.

C. Bait Dealer's License. It is unlawful for any person to deal in live bait-fish without first obtaining a valid bait dealer's license. (Note: A bait dealer's license is not required of those who take live bait only for their own use. However, a fishing license is required in order for a non-bait dealer to take live bait, and he is limited to use of hook and line or bait trap in taking the bait.)

There are two types of bait dealer's licenses.

1. The regular bait dealer's license costs \$17. (annually) and allows the license holder to take minnows and other unprotected bait-fish for resale by use of hook and line or bait traps, or by use of a seine or bag net not over 8 feet in depth by 150 feet in length. This license also allows the license holder to take smelts for resale in accordance with rules which pertain to the taking of smelts. Therefore, a person holding the regular (\$17.) bait dealer's license may take up to 2 quarts of smelts a day as follows:

a. By hook and line or dip net from inland waters which are naturally free of ice and where the taking of smelts is not prohibited by rule; or

b. By hook and line through the ice from inland waters which are open to ice fishing for smelts. (Note: There is also a special rule in effect which allows licensed bait dealers to use a dip net in taking smelts through the ice. See rules pertaining to bait dealers at the end of this section.)

2. The live smelt bait dealer's license costs \$62. (annually) and allows the the license holder to take, at any time, up to 8 quarts of smelts a day for resale by use of dip net, drop net or hook and line from certain inland waters as designated by the Commissioner. A list of these waters is available upon request from the Department office in Augusta. (Note: Very few waters in the southern portion of the State are open to the taking of smelts under this license, and bait dealers are encouraged to check the list of designated waters before purchasing the \$62. license.)

D. Possession of smelts by bait dealers. Licensed bait dealers may possess more than one day's limit of smelts as long as the smelts were legally taken.

E. Permit to take bait from closed waters. Any person (including licensed bait dealers) who wishes to take live minnows or other unprotected bait-fish from inland waters which are not currently open to fishing must first obtain a written permit through the local game warden. There is no charge for this permit. (Note: No permit is required to take bait-fish from inland waters during the open fishing season on those waters.)

F. Bait traps to be marked. All bait traps and bait holding boxes must be marked with the name and address of the person who is taking or holding the bait.

RULES PERTAINING TO BAIT DEALERS

The holder of a live-bait dealer's license issued pursuant to Title 12, MRSA, Section

7171 (Regular \$17. license), may use a dip-net to take smelts through the ice in the daytime from waters which are open to ice fishing for smelts and in the nighttime from waters which are open to ice fishing for smelts at night, except that these provisions do not apply to waters which are restricted to the taking of smelts by hook and line only or to Boundary Waters between Maine and New Brunswick and between Maine and New Hampshire.

HIGHLIGHTS OF MAINE BOATING LAW

Fishermen who use boats should be sure their craft are properly registered, equipped, and operated as required by the Maine boat law. Highlights of this law are stated below. For a complete copy of the law, an application to register your boat, or further information, contact the Division of Recreational Safety and Registration, 284 State St., Augusta, Maine 04333. Phone: 289-2043. **Note: Certain waters have restrictions on the use of motors on watercraft; for your convenience, these are listed with the special fishing rules.**

1. Maine's boat law is federally approved. The law requires that **any boat** equipped with machinery of **any horsepower** be registered. This includes boats of any kind, such as sailboats, canoes, dinghies, and rowboats that are equipped with mechanical propulsion even though the motor is not in use. License is good for 3 years. Assigned registration number must be displayed on both sides of the bow of the boat. In addition, the law also requires the display of a validation sticker which is issued upon registration. This sticker, which indicates the registration expiration date, should be located at the end of each boat number. The registration certificate must also be aboard when boat is being operated.
2. Boats validly registered in other states having a federally approved law can operate without licensing in Maine.
3. Watercraft less than 16 feet (and all canoes and kayaks regardless of length) must carry at least one Coast Guard approved personal flotation device for each person aboard; can be either Type I, II, III, or IV (buoyant cushion). Craft 16 feet or longer must carry either a Type I, II, or III for each person aboard PLUS one Type IV device immediately available in boat.
4. Boating accidents involving personal injury, death, or property damage estimated at 100 dollars or more must be reported to Division of Recreational Safety and Registration.
5. Operation to endanger persons or property in a reckless manner, or under the influence of alcohol or drugs, is prohibited.
6. Prudent and reasonable speed required at all times.
7. Water skiing requires observer and operator in tow boat; no skiing within 200 feet of shoreline except to launch or discharge skier; no skiing ½ hour after sunset to ½ hour before sunrise; skier must wear a flotation device.
8. No person under 12 years of age shall operate a boat of more than 10 horsepower, unless under the immediate supervision of person who is at least 16 years of age.
9. All watercraft must display lights while operating between sunset and sunrise and carry such other safety equipment as is required by federal and state laws.
